

# Modular Saltroom

The modular saltroom, made from pre-fabricated salt coated panels, is easy to assemble. It is also easy to disassemble a modular salt room for transport. Assembly of a modular saltroom takes from 3 to 5 hours then it is ready for immediately operation.

Modular saltrooms are available in 1, 2 or 3 person capacity.

A modular saltroom is great to expand an existing spa's treatment offerings. It can also be used at the workplace, for example at theatres or music schools to improve vocal performance. Another convenient use for a modular saltroom is in the home.

The modular saltroom uses a filtered exhaust fan to ventilate the room between treatments. To operate the modular saltroom only needs a standard 240VAC/10A electrical wall outlet.
